

INTERNS FROM GERMANY

For Health, Energy, Education, Environment and Business Internships in Alberta

The Alberta-Saxony intercultural internship Alliance (ASiiA) Program was launched in 2010 based on the cooperation between university consortium members in Alberta, Canada and Saxony, Germany.

THE ASIIA PROGRAM AIMS TO:

- Promote transatlantic mobility, intercultural learning and professional networking for young leaders involved in research, technology and business practices,
- Foster the Alberta-Saxony regional relationship in the fields of higher education and industry cooperation,
- Facilitate the regional and international knowledge and technology transfer by bringing together universities and companies in both regions,
- Introduce participating interns to the economic, scientific and technological achievements as well as to the historical and cultural heritage of the host region.

HOSTING INTERNS FROM SAXONY ENABLES YOUR ORGANIZATION TO:

- Establish regional partnerships with companies, universities and research institutes in Saxony via the trainees,
- Expand a network of contacts in industry, business and research,
- Profit from the professional, methodological and foreign language skills of Saxon students and graduates,
- Gain insights into work and organization methods of the partner region.

ASIIA COORDINATING OFFICES WILL:

- Recruit well-trained young professionals for your organization,
- Advise and support your organization in all matters concerning the placement,
- Work with your organization to create internship contract agreements,
- Provide students/graduates with support in acquiring a work visa,
- Prepare the trainee for the internship prior to departure.
- If you are interested in hiring qualified and highly motivated interns from Germany, you are welcome to contact us for further questions:
